

CLASSIC UPDATE SERIES 1967, 1968, 1969

**ALL
NEW**

The Chevrolet Camaro has long been the muscle car of choice for many, and American Autowire/Factory Fit has manufactured original replacement OE harnesses to keep these beauties in tip-top shape. Now, AMERICAN AUTOWIRE/FACTORY FIT, presents a Classic Update Series Harness to bring that classic muscle car into the 21st century and beyond. Imagine being able to install a single harness kit that contains all of the correct connections to every piece of your original equipment; AC, interior lighting, wipers, column, as well as having the option to add any of the top name accessories being produced as well. All this in a SINGLE KIT! Since we own all of the correct connectors, plugs and terminals that are needed to make this a plug-n-play harness you can rest assured that you are getting the most comprehensive and adaptive harness system on the planet for the 1st Generation Camaro - bar none. If your electrical system requirements exceed the capabilities of your original wiring system, this is the perfect combination of modern high power output and installation ease. With our extensive knowledge in wiring systems for the first generation Camaro, you can rely on the proven craftsmanship that goes into every American Autowire Classic Update Series Harness System.

The completely new 18 fuse, 21 circuit, fuse box system that the Classic Update Series is built around comes completely ready to install under the dash. The harness that is mounted under the dash was assembled to accommodate the factory dash supports while not interfering with any aftermarket equipment that you will install under the dash now or in the future.

Wiring for the front lights and engine are supplied with long lengths and can be routed completely custom or, using supplied original connectors and terminals simply routed in the factory location minimizing body modifications!

Complete gauge connection system is provided. Not only for the standard aftermarket gauge packages but also all the correct original connectors and terminals to reconnect your original gauge cluster into your new harness without using the common "butt splice"!
